

Did you know...

...Diamonds are a lady's Christian's best friend! Yes! It's true. Not only are they a lady's best friend, but they are every Christian's best friend as well!

Explanation: God could have created the earth any time He wanted; e.g. thousands or billions of years ago. Biblical genealogies strongly support a very young earth; perhaps as young as 6 thousand years. On the other hand, evolution requires billions of years since it is based on the premise that; given enough time, practically anything can happen. So how old is the earth? Evolutionists like to talk as if "everyone knows" the earth is billions of years old. However, there happens to be substantial evidence that the earth can only possibly be thousands of years old! Diamonds provide extraordinary evidence of a very young earth.

As you know, diamonds are made of practically pure carbon. They are a lady's best friend in part, due to their "purity." The crystal lattice of a diamond is so impervious that it is practically impossible to contaminate. As you may also be aware, some naturally occurring carbon is in the form of "carbon 14" instead of "carbon 12." This means that the carbon 14 atoms have two more protons than the carbon 12 atoms. (Let's abbreviate them as "C14" and "C12".) C14 naturally decays into the gas, nitrogen 14, which we will abbreviate as N14.

This is where the excitement begins. Creation scientists have sent diamond samples to very sophisticated laboratories designed to "count" the individual atoms of the sample. IF, as evolutionists claim, diamonds were formed billions of years ago, THEN there should be NO measurable C14 remaining in the diamonds. C14 has a relatively short life (i.e. it decays into N14 relatively rapidly) and would be completely undetectable if the diamonds were only 100 thousand years old. (Yes – thousand, not billion!) HOWEVER, as a special friend to Christians, the C14 remaining in diamonds is easily detectable indicating that diamonds are only thousands of years old; not billions! Also, since diamonds are impervious to contamination, no evolutionary counter argument exists!

As always, Our God Reigns! And the "stones" do cry out to the glory of God!
Luke 19:40!
